

## Role Description: User Interface / User experience designer

### **Bangkok Labs - about us:**

Bangkok Labs is a small team of friendly, focused talented people, who work within an agile environment on exciting platform development products that are driving significant change in the global media sector. Joining us is not just about the work, we are a socially connected, positive team that enjoys hanging out and having fun.

### **Who we are looking for:**

Bangkok Labs is looking for a UI / UX designer who loves great design, has an aptitude for functionality and can work a fast pace within quick turnarounds. The work involves a web based platform that has customers in many global markets, so a good skill of written and spoken business English is a requirement for applicants.

### **Key responsibilities:**

Working closely within an agile environment - the role involves constant interaction with the Thai dev team, and Global Product Manager to deliver an engaging and intuitive product. Day to day responsibilities encompass:

- Take user and stakeholders requirements, understand use case and develop into a Platform feature of workflow idea
- Develop the design solution focussing on both business requirements and user function
- Design the information architecture, user-flow, wireframe, prototype, high fidelity UI and up to MVP stage
- Utilize Platform based analytic tools to understand the user behaviour and drive design decisions
- Work closely with the dev team to ensure design requirements are understood, and basis for design is supported by Platform function
- Maintenance and design requirements of the company website

### **Basic qualifications**

- Experience with design tools e.g. Sketch, Adobe XD, Figma or equivalent
- Good communication skill both Thai and English
- Understanding of the principles of responsive design, CSS and html preferred
- Willingness to learn and be accountable for output within a small team is essential

### **Benefits and remuneration**

- Flexible hours and working locations
- Small agile team
- Generous annual leave
- Retention based bonus structure
- 30-40K negotiable based on experience
